

DRAFT FOR REVIEW. Have this agreement checked by a lawyer before selling licences, then delete this box.

Cloche End User Licence Agreement

Edition 1.004, 2026-10-02.

Licensor: Ricky Richards (<https://rickyrichards.com>), contact hello@rickyrichards.com

This agreement is between you (the "Licensee", the person or organisation named on the invoice) and Ricky Richards (the "Licensor"). By installing or using the Cloche font software you agree to it.

1 Definitions

"Font Software": the Cloche font files in any format, including OTF, TTF, WOFF2 and variable fonts, and any updates. "Licence Order": your invoice, which states the licence types and limits you bought (seats, domains, pageviews, apps).

2 Grant

The Licensor grants you a non-exclusive, non-transferable, worldwide, perpetual licence to use the Font Software within the limits on your Licence Order. The Font Software is licensed, not sold; the Licensor keeps all rights in it.

3 Desktop licence

Install the Font Software on the number of computers (seats) on your Licence Order, and use it to create static images and documents: print, packaging, PDFs, images, video and logos, for yourself or for your clients. You may embed it in PDF documents with editing disabled (preview and print embedding).

4 Web licence

Embed the WOFF2 files on the domain(s) on your Licence Order using @font-face, up to the monthly pageviews stated. Take reasonable steps to stop the font files being downloaded or used outside those domains.

5 App, game and ePub licence

Embed the Font Software in the number of apps, games or ePublications on your Licence Order, protected so that end users cannot extract it.

6 Broadcast, social and other uses

Need an extra licence; contact the Licensor.

7 Contractors

You may give the Font Software to a contractor working on your behalf, for that work only. The contractor must delete it when the work ends.

8 Restrictions

You may not: share, sell, rent, sublicense or otherwise give away the Font Software; convert it to other formats (except WOFF2 for web use under section 4); modify, rename or create derivative fonts from it (you may alter the outlines of individual letters as artwork, for example in a logo); use it, or outputs made from it, to train or fine-tune machine-learning models or generate typefaces; or remove copyright or licence information from it.

9 Upgrades

To go beyond your limits (more seats, domains, pageviews or apps), buy an upgrade.

10 Warranty and liability

The Licensor warrants that the Font Software will perform substantially as described for 90 days from purchase, and will replace defective files. Otherwise the Font Software is provided "as is". To the extent the law allows, the Licensor's total liability is limited to the price you paid.

11 Termination

This licence ends automatically if you break it. You must then delete the Font Software from all devices and servers. Work you published before termination may remain.

12 Governing law

[Jurisdiction to be confirmed.]
